

PARSONS

CYBERSECURITY PORTFOLIO OF SOLUTIONS

COMPANY OVERVIEW

Founded in 1944, Parsons is an engineering, construction, technical, and professional services firm with revenues of \$3.1 billion in 2014.

Parsons is a leader in many diversified markets with a focus on defense/security, industrial, and infrastructure. Parsons delivers design/design-build, program/construction management, and other professional services packaged in innovative alternative delivery methods to federal, regional, and local government agencies, as well as to private industrial customers worldwide.

We conquer the toughest logistical and technical challenges and deliver landmark projects worldwide. Today, more than 15,000 Parsons employees are engaged in executing nearly 5,000 projects in all 50 states, and in 29 countries across the globe. For more information about Parsons, please visit www.parsons.com.

BUILDING A FULL-SPECTRUM CONVERGED SECURITY OFFERING

For more than 30 years, Parsons has worked behind the scenes delivering cybersecurity services to protect our nation's most sensitive information and critical infrastructure. Our full-spectrum of cybersecurity and critical infrastructure solutions come together as our converged security offering.

CYBERSECURITY SOLUTIONS

- ▶ Vulnerability assessments
- ▶ Penetration testing
- ▶ Information assurance
- ▶ Incident response
- ▶ Certification and accreditation of cybersystems
- ▶ Cyberpolicy development and implementation
- ▶ Cyberthreat identification, analysis, and mitigation

CRITICAL ASSET PROTECTION

- ▶ Industrial Control Systems/Supervisory Control and Data Acquisition (ICS/SCADA) engineering and integration services

- ▶ Identity, credentialing, and access management (ICAM) systems
- ▶ Integrated electronic security systems
- ▶ Integrated enterprise physical security systems
- ▶ HSPD-12-certified integrator
- ▶ Integrated security operations control (PSIM)
- ▶ Threat/vulnerability assessments and mitigation

INTEGRATED NETWORK SOLUTIONS

- ▶ Network design, engineering, and development
- ▶ Cloud computing
- ▶ High-performance network implementation and operations
- ▶ Data center modernization and enterprise visualization
- ▶ NOC/SOC operations and management
- ▶ Network research and development
- ▶ Advanced protocols and secure routing deployments

NEW WAYS OF ATTACKING THE PROBLEM

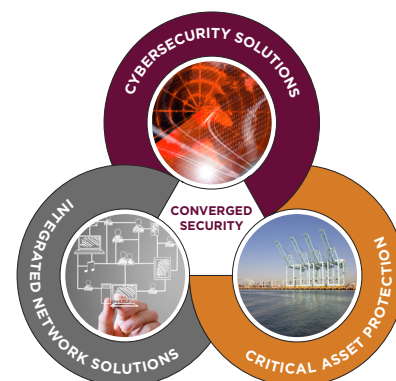

Although traditional methods can address cybersecurity, the Parsons' team processes build opportunities for innovation at each step. Examples of this include the following:

- ▶ Our Cyber Solutions Center takes operational technology (OT) and information technology (IT) visualization and attack simulation to the next level.
- ▶ Our ICAM privilege and our identity management engine address converged environments for identity management and access control.
- ▶ Our crash analysis tool, Cran™, offers a unique and economical severity layer to SIEM deployments.
- ▶ Our BloodHound™ tool offers DNS signing and advanced protocol security at the enterprise level.

And, that is just the start.

YOUR TRUSTED ADVISER

We take great pride in our record of helping our federal and commercial customers with their most important security challenges. We deliver proven solutions and are ready to help you.

OUR CUSTOMERS

- ▶ Numerous federal agencies and intelligence community
- ▶ U.S. Department of Defense
- ▶ U.S. Department of Homeland Security
- ▶ Major municipal utilities
- ▶ Major transit and port authorities
- ▶ Higher education universities
- ▶ Additional confidential government, critical infrastructure, and commercial industry customers
