

Design. Build. Protect.

Critical Asset Protection

creating a safer world

Enterprise Physical Security Systems

Parsons is an expert in physical security systems, providing our customers with best-of-breed, network-based, enterprise physical security systems for geographically distributed facilities. We are proud of the support we provide to the US Army Corps of Engineers (USACE), Department of State, Pentagon Force Protection Agency (PFPA), and Department of Interior to guarantee that their facilities around the globe are secure in an insecure world.

A full life-cycle provider of security systems, Parsons starts at square one with thorough site surveys, then develops the design, installs the systems, performs all quality assurance and penetration testing, and provides support all the way through customer acceptance and training. As experts in physical security systems, we have extensive experience with surveying; testing; and installing ACSs, IDSs, CCTVs (closed circuit TVs), mass notification systems (MNSs), intercoms, and C4I (command, control, communications, computers, and intelligence) systems.

Vulnerability and Risk Assessments

Our “holistic” approach to vulnerability and risk assessments considers all factors—people, the assets to be protected, and operational parameters. Each site survey and design includes a complete vulnerability assessment and tradeoff analysis to meet Interagency Security Committee, Director of National Intelligence and Department of Defense (DoD) physical security requirements for sensitive compartmented information facilities (SCIFs), arms and ammunition facilities, and other high-value or high-risk assets.

Intrusion Detection and Surveillance

In support of the US Army Product Manager, Force Protection Systems (PM-FPS), we are the prime contractor for the Integrated Commercial Intrusion Detection System (ICIDS IV) program and are responsible for procurement, design, installation, and maintenance of intrusion detection, entry control, and CCTV systems at US Army installations worldwide.

Identity, Credential, and Access Management

We designed and deployed the Privilege Management Program (PMP) system for the PFPA. PMP automates and manages identity, credential, and access privilege information for more than 70,000 employees and 250,000 annual visitors who enter the Pentagon Reservation and designated DoD facilities in the National Capital Region. It supports one, two, and three-factor PIV authentication mechanisms including multi-modal biometric verification to comply with Federal CIO Council, Office of Management and Budget and Homeland Presidential Security Directive 12 (HSPD-12) requirements.

Cybersecurity

Our enterprise physical security systems are designed and deployed with cybersecurity in mind. Parsons ensures all aspects of DoD Information Assurance Certification and Accreditation Process (DIACAP) and the new National Institute of Standards and Technology (NIST) Risk Management Framework (RMF) are met.

Company Overview

Founded in 1944, Parsons is an engineering, construction, technical, and professional services firm with \$3.2 billion in revenue in 2015.

Parsons is a leader in many diversified markets with a focus on infrastructure, industrial, federal, and construction. Parsons delivers design/design-build, program/construction management, and other professional services packaged in innovative alternative delivery methods to federal, regional, and local government agencies, as well as to private industrial customers worldwide.

We conquer the toughest logistical and technical challenges and deliver landmark projects across the globe. Today, Parsons employees are engaged in projects in 29 countries around the world.

Technology Studies and Recommendations

Our personnel are knowledgeable and experienced in state-of-the-art and best-of-breed electronic security systems responsible for the independent validation, verification, and certification of technical security systems for customer facilities worldwide.

Who We Serve

- US Army (USACE and JPdM-FPS)
- Department of Homeland Security
- Department of Interior (BOR Dams/Park Service)
- Department of State
- Executive Branch Federal Civilian Agencies and National Icons
- US Navy (SPAWAR)
- US Air Force
- US Treasury
