A LEGACY OF SERVICE TO THOSE WHO SERVE US

COMPANY OVERVIEW

Parsons is a technology-driven engineering services firm with more than 70 years of experience in the engineering, construction, technical, and professional services industries.

The corporation is a leader in many diversified markets with a focus on infrastructure, defense, and construction. Parsons delivers design/design-build, program/construction management, systems design/engineering, cyber/converged security, and other professional services packaged in innovative alternative delivery methods to federal, regional, and local government agencies, as well as to private industrial customers worldwide.

We conquer the toughest logistical and technical challenges and deliver landmark projects across the globe. Today, Parsons employees are engaged in projects in 29 countries around the world.

ABOUT PARSONS' WARFIGHTER TRAINING & SERVICES

Parsons supports the full range of live, virtual, and constructive (LVC) training requirements from individual training to collective training at home stations, the Combat Training Centers, and other training facilities throughout the world. On any given day, more than 600 Parsons employees are engaged in training and training support for US military ground forces. Parsons provides program management, technical and analytical services, training, and training support services for the Sustainable Range Program, Combat Training Center Modernization Program, Mission Command Training Program, Soldier Training Support Program, and Training Information Infrastructure Program in support of the Training Support System - Enterprise (TSS-E) contract. Our global resources assure our customers that we have the financial capabilities, technical expertise, and available manpower to undertake any project and to supply all the necessary skills and resources required for mission success.

Parsons is technically experienced in enabling models, simulations, games, mission command systems, and supporting networks, as well as their integration. We conduct new equipment training and/or delta training. Parsons is a world-class provider of information assurance technology and technical support of simulation and training systems. We offer experience in simulation technologies that is directly applicable to operational force mission command training support, gaming and mobile applications development, capabilities development, exercise and VV&A support, integration and operation of the JLCCTC federations, senior-level systems integration support, and system test-bed software concept solutions development in support of the US Army's integrated training environment. We also provide joint live, virtual, and constructive near-term integration and architecture requirements support, as well as worldwide training support for Army and Joint Force training events and exercises.

Through our Army National Guard (ARNG) Mission Command Training Support Program (MCTSP), Parsons trains National Guard services members at six mission training complexes (MTCs) across the country. Our staff, distributed across all 54 states and territories, have trained 700+ units and 28,000+ soldiers, helping them develop and sustain commanders,

battle staffs, information system operators, and leaders in the art and science of mission command. We train personnel via distributed simulation systems and mobile training teams. Parsons supports 8 ARNG divisions, 28 brigade combat teams (BCTs), and 139 other support brigades, functional brigades, and brigade equivalents.

Parsons' Warfighter Training & Services portfolio includes broad-scope training and exercise support to Special Operations Forces (SOF) from all US military services, the Joint Special Operations Command (SOCOM), the US interagency/intelligence community, nongovernmental organizations, and foreign partners. Parsons provides training and exercise support at SOCOM headquarters in Tampa, FL, at SOCOM's Service Component Commands, at Theater Special Operations Command sites, at the Geographic Combatant Commands, and at key military training ranges/locations in the United States and abroad. Parsons provides senior, seasoned subject matter experts in SOF tactics, techniques, and procedures; and senior exercise planners; and scenario developers based on key SOF themes, requirements, and real-world experience. Parsons also provides unique and premier cyber-warfare, SOF-tailored information technology capabilities and communication support for SOCOM's exercise regime.

TRAINING SERVICES

Parsons' accomplishments related to training services include the following:

- Provide Training Aids, Devices, Simulators and Simulations (TADSS) instructor/operators at 17 Army National Guard Training Support Centers and the National Training Center at Fort Irwin, CA
- Provide improvised explosive device defeat training support across US Army Pacific Command (USARPAC) installations
- Operate the Army's Geospatial Support Centers in both the United States and Germany for the Army Sustainable Range Program
- Provide on-site technical support for the nine LVC-integrating architecture (LVC-IA) fielding locations in CONUS and OCONUS
- Provide USARPAC technical support to the Joint Pacific Multinational Readiness Capability, an exportable Pacific Theater Combat Training Center capable of training Army, Joint, and multinational forces from battalion through brigade combat team levels
- Provide linguists and role player support to the National Training Center
- Provide infantry immersive trainers to the USMC at Camp Pendleton, Camp Lejeune, and in Hawaii
- Provide Integrated Training Area Management (ITAM) for 20 Army Installation Management Command (IMCOM) installations, and training ranges maintenance and sustainment at the Army Maneuver Center of Excellence and Camp Roberts in support of the Army Sustainable Range Program (SRP)
- Provided course development and workforce developmental training at TRADOC Centers of Excellence and Schools to support Army Force Modernization proponents, in support of the Education Support Division of the Army Training Support Center

Parsons' Warfighter Training & Services portfolio includes training for SOCOM units in the following areas:

- Real-world combat operations:
  - Contingencies
  - Crisis event support
  - Kinetic direct action missions
  - Foreign internal defense
  - Counterterrorism/counterinsurgency
- Critical infrastructure/law enforcement and emergency incident management:
  - Tabletop exercises
  - Emergency response protocols
  - Critical infrastructure protection
- Realistic field exercises:
  - Provide command-wide exercises for tactical level sustainment
  - Work with commands to understand specific needs
  - Create real-world scenarios
