

NAVIGATING COMPLEXITY

In an increasingly complex technical and operational global security environment, Polaris Alpha provides advanced technical capabilities, specialized domain expertise, and mission-critical solutions to Department of Defense and Intelligence Community customers. Polaris Alpha brings the agility of a focused, mid-sized company to assist these customers in navigating complexity across the full spectrum of air, land, sea, cyber, and space domains.

Created from the coming together of emerging industry visionaries—all known for their cutting-edge capabilities, people-focused cultures, and “mission first” mindsets—and with more than 1,300 technical experts providing deep subject matter expertise and advanced technology, software, and solutions, Polaris Alpha is leading the way in addressing next-generation national security challenges.

CORE CAPABILITIES

Cyber and Signals Intelligence focuses on fortifying our nation’s cyber infrastructure against threats to critical information infrastructure.

Space Solutions aims to address advances in space, focusing on building the next generation of analysis and decision-making tools.

Intelligence and Analytics develops, integrates, and maintains solutions that facilitate information sharing and data analysis in complex operational environments.

Machine Learning and Artificial Intelligence delivers means for faster, easier, and more efficient decision making.

Multi-Domain Command and Control provides innovative software for mission management, strategic assessment, and situational awareness to effectively address threats in today’s multi-domain environment.

Electromagnetic Warfare merges and masters this critical environment, supporting the warfighter in current and future conflicts to ensure that the U.S. remains at the forefront of this new frontier.

Rapid Prototyping not only provides the means to develop innovative products but also focuses on keeping costs as low as possible.

Specialty Engineering provides information and engagement dominance through smart-sensing technologies that deliver improved situational awareness across the command structure.

Public Safety offers the technology—and the proficiency in data engineering—to equip public safety agencies with ways to generate the knowledge and intelligence needed to keep communities safe and secure

Polaris Alpha has major offices in Annapolis Junction, MD; Columbia, MD; Aberdeen Proving Ground, MD; Colorado Springs, CO; Denver, CO; and Fredericksburg, VA, as well as customer sites both domestically and internationally.
