**PARSONS**®

SIGMAFLOW BEACON

A purpose-built solution for NERC CIP baseline management.

The Problem

Baseline management is complex and requires many hours of technical work involving multiple tools—often creating a disconnect between IT and compliance.

The Solution

SigmaFlow Beacon is a fast, easy, seamless, purpose-built baseline monitoring solution for NERC CIP compliance. Your team can now perform all its work in one easy-to-use interface.

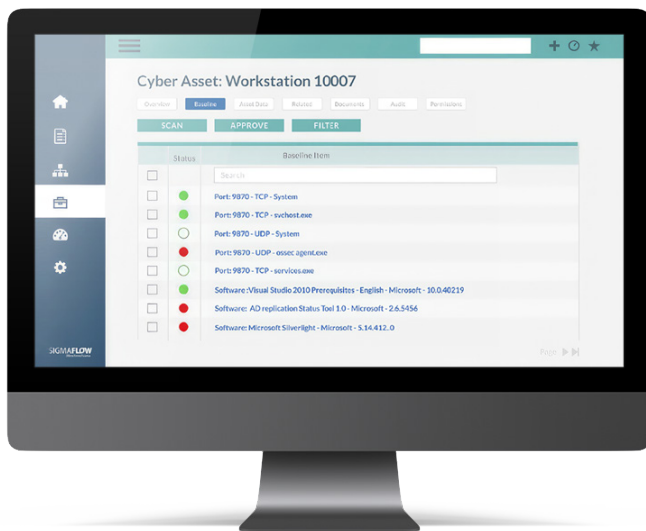

SigmaFlow Beacon is a purpose-built solution for NERC CIP baseline management. The module extends the **SigmaFlow Compliance Platform** to collect baseline data in real time for approvals, notifications, and reporting.

Seamless CIP compliance. The only product on the market that is natively connected and fully integrated into a NERC compliance management system—delivering audit-ready historical reporting.

Saves time. A solution that reduces the number of steps necessary to manage baselines, allowing users to take action directly in the compliance management system.

Rapid deployment. Light and reliable agents, making SigmaFlow Beacon faster and easier to implement than most other monitoring solutions, with no rules to configure or maintain.

Baseline Monitoring Optimized For NERC Compliance
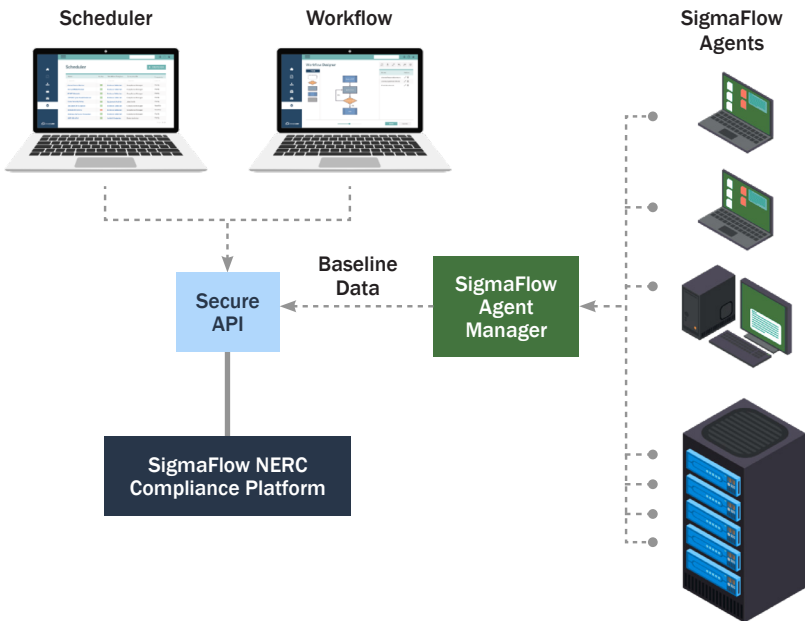

SigmaFlow Beacon is a major step toward our vision of bringing compliance and security teams together, at the same time simplifying the act of maintaining compliance and delivering real-world cybersecurity protection.

SigmaFlow Beacon Extends Our Capabilities To Solve Some Of The Biggest CIP Challenges
