Open Enrollment

Open Enrollment courses are a great option for organizations that require longer term planning for training in PAI investigation and signature reduction techniques. These courses are held online, several times per year, so that you have flexibility in keeping with your operational tempo, and students can gain collaborative insights from working in an inter-agency environment.

Certification

Students who successfully graduate from CASO and CSR courses will be eligible to become certified. Once all certification requirements are met and evaluated by Parsons, students will receive a certificate recognizing their proficiency in the skills and methods acquired during the program.

Delivery

All courses are scheduled online. Dedicated iterations may be conducted in Fayetteville, NC or Herndon, VA upon demand. Mobile training teams are available to host specially-tailored courses in your location.

Course dates are subject to change pending minimum student enrollment is reached.

Distance Virtual Learning

Parsons TOG has created a unique and secure instructional platform utilizing US Government approved encrypted solutions through Office 365 applications which are Tier C compliant. This broad set of global compliance and data protection requirements includes ISO 27001, ISO 27018, EUMC, SOC 1 Type I & II, SOC 2 Type I and II, HIPAA and FERPA. The TOG training platform enforces multifactor authentication and industry best practice information assurance controls while enabling powerful training programs to operate with only acquired during the program.

Creating a Dedicated Course

All open enrollment courses can be customized for your operational needs.

Customers who would like to address specific training requirements can work with us to create a dedicated course for their group of 8 or more. We readily modify training themes, AOR concentrations, tools taught, and techniques requested.

Customers can create their own training pipelines from our full course catalog.

In addition to our open enrollment options, we offer the following courses for customers seeking to create custom training solutions for their teams.

- Commercial Signature Reduction (CSR)
- Safe Traveler (self-paced course)
- Virtual Operations Training Course (VOTC)
- Counter-Intelligence/HUMINT Training
- Cellular Theory
