ADVANCED DIGITAL DISCOVERY (AD2)

Distance Virtual Learning

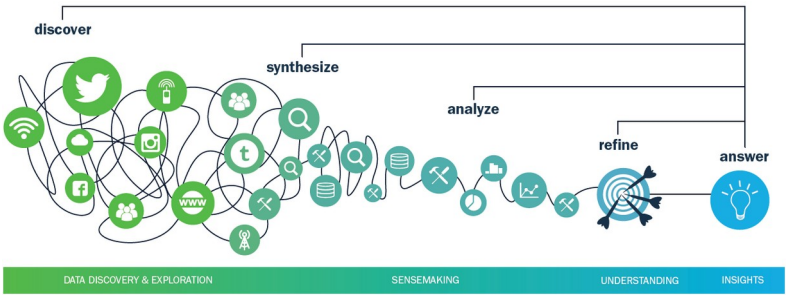

Course Overview:

Advanced Digital Discovery (AD2) is a five-day course that equips your researchers with the necessary skills and tools to safely navigate the digital environment in a manner that allows the student and your organization to stay a step ahead of those trying to cause harm to your people, reputation, resources, assets, networks, supply chains, and national security.

TOG extracted the most relevant digital research methodologies from our proven CASO™ course and created a program of instruction focused on teaching effective methodologies irrespective of the tools being used, thereby maximizing your organization's ROI.

Held online or in-person, AD2 utilizes a combination of interactive instruction and hands-on practical application centered around your organization's requirements. Students use a majority of publicly available tools to enable the digital discovery cycle, with an introduction to commercial analytics.

Students learn to safely discover, analyze, and report publicly available data and metadata, and to use critical thinking to provide timely and actionable insights for decision makers.

AD2 Quick Stats

- **Five-day** introductory course in PAI investigative discovery and analysis techniques.
- **Hands-on** holistic, skills-based training covering a wide scope of mission sets.
- **Train Anywhere**: Safe and secure online training solutions from home or work.
- Available as a scheduled **open enrollment** iteration online, or as a **dedicated course** for your organization, anywhere.
- Parsons TOG Instructors bring **200+ years** combined experience and have trained more than **3000 graduates** in recent years.

Delivery:

Parsons TOG offers training online, in person at our facilities in Herndon, VA, and Fayetteville, NC, or on-site through mobile training teams. Our secure virtual platform uses US Government–approved, Tier C–compliant encrypted Office 365 solutions that meet ISO, SOC, HIPAA, and FERPA standards and enforce multi-factor authentication. Our security-cleared instructors can train in any environment that meets required standards, ensuring compliance with your operational security requirements.
