PARSONS®

MicroCOSMO

One-Week Condensed COSMO Without Research Projects

Course Overview

MicroCOSMO is a five-day course that equips your researchers with the necessary skills and tools to safely navigate the digital environment in a manner that allows the student and your organization to stay a step ahead of those trying to cause harm to national security, your people, reputation, resources, assets, network, and supply chain.

Parsons Technical Operations Group extracted the most relevant digital research methodologies from our proven CASO™ course and created a program of instruction focused on teaching effective methodologies irrespective of the tools being used, thereby maximizing your organization's ROI.

Held online or in-person, MicroCOSMO utilizes a combination of interactive instruction and hands-on practical application centered around your organization's requirements.

Students use a majority of publicly available tools to enable the digital discovery cycle, with an introduction to commercial analytics. Students learn to safely discover, analyze, and report publicly available data and metadata, and to think critically to provide meaningful context in timely, actionable insights for decision makers.

Product Quick Stats:

- Five-day introductory course in OSINT and PAI investigative discovery and analysis techniques.
- Hands-on holistic, skills-based training covering a wide scope of missions sets.
- Train Anywhere: Safe and secure online training solutions from home or work.
- Integration of publicly available tools, with an introduction to commercial analytics.
- Available as a scheduled open enrollment iteration online, or as a dedicated course for your organization, anywhere.
- Ours instructors bring 200+ years combined experience and have trained more than 3000 graduates in recent years.

Distance Virtual Learning

Parsons Technical Operations Group has created a unique and secure instructional platform utilizing US Government-approved encrypted solutions through Office 365 applications, which are Tier C compliant. This broad set of global compliance and data protection requirements includes ISO 27001, ISO 27018, EUMC, SOC 1 Type I & II, SOC 2 Type I and II, HIPAA, and FERPA. This training platform enforces multi-factor authentication and industry best-practice information assurance controls while enabling powerful training programs to operate with only an adequate Internet connection and a student computer.

Course Capstone

Delivery

Parsons TOG offers training online, in person at our facilities in Herndon, VA, and Fayetteville, NC, or on-site through mobile training teams. Our secure virtual platform uses US Government–approved, Tier C–compliant encrypted Office 365 solutions that meet ISO, SOC, HIPAA, and FERPA standards and enforce multi-factor authentication. Our security-cleared instructors can train in any environment that meets required standards, ensuring compliance with your operational security requirements.
